# Welcome

to the 9th Annual

## POWERPAK BULL SALE!

As we prepare for our 9th Annual PowerPak Bull Sale we reflect back to the first Bull Sale in 2006. Tony and Dennis had this crazy idea to start a "new" bull sale with the vision that the livestock industry would improve in the post BSE era. Well, 2014 was the first year since BSE that ALL livestock producers were making some money. Livestock producers are very persistent through drought, hard times, BSE and all other industry hoops and finally it's paying off.

The PowerPak Bull Sale has evolved also into three Consignors bringing you their best; through strict culling, performance testing and persistence. Each year we learn and improve our herds and get excited about sale day. With costs continuing to increase, it has been good to see the cow/calf operator get more money for all their hard work. This in turn encourages us to continue to raise good stock for your use. PowerPak has an awesome set of bulls on offer this year. Take advantage of the heifer bulls on offer for those of you that are expanding your herd. The excellent set of herd bulls on offer will provide you the ability to continue the development of your cow herd with high performing bulls.

We're hoping for good weather sale day. We are also hoping to see you all. If for any reason you cannot make the sale and are interested in buying a bull, please contact any one of us. We will help you with your purchase over the phone, or through a pre-arranged bid. Or call any of the sale staff at the Fort Macleod Auction Market. We'll stand behind our bulls, and want you to be happy with your purchases.

Come early to view and select the right bulls for your operation, and to visit. Please stay after the sale for a feast of BBQ beef, and some PowerPak hospitality.

## Feature DONATION LOT

### Barbeque-To-You!!

The PowerPak Crew has started the sale with the "Barbeque-To-You" donation lot since the 2010 sale. In that time, you have helped us raise close to \$10,000.00 for local charities.

We all have family members or loved ones that have been touched with cancer, and know the effect it has on family life. So the PowerPak crew felt it would be good to go with the Canadian Cancer Society (Alberta/NWT Division) again this year. Within the Cancer Society we are delegating the donation funds go towards their Financial Assistance Program and that it stay in Southern Alberta. Through this program most of the funds are dedicated to rural families.

Once again the PowerPak crew will donate two prime rib roasts, as well as the barbeque, briquettes, Tony's "Secret Sauce" and his time to travel to your barbeque function (family reunion, yard party, branding) and serve them to your guests. These two roasts will feed approximately 40 people.

If you are having a function with more than 40 people, don't worry – we can work together to make it happen. So if there is a larger party in your plans, you supply the extra meat and Tony will cook it up at no extra cost. Here is the chance to have a wonderful barbeque while knowing that you are at the same time helping a good cause.

Thank you for helping the PowerPak crew support this great foundation

### **A brief overview of the "Financial Assistance" Program**

Assistance if you need it! The Financial Assistance Program is one of the support services offered by the Canadian Cancer Society, Alberta/NWT Division. The program gives support to people in financial need for transportation and accommodation when travelling to and from treatments and appointments at cancer treatment facilities in Alberta.

#### **– Financial Support –**

The amount of financial support available depends on your:

- household income
- distance from the cancer centre where treatment will be received
- additional medical expenses
- extenuating circumstances

Based on an assessment of means through the application

process, you must demonstrate financial need for the program. A situational assessment will be conducted, taking into account factors affecting current financial status, including net income, number of dependents, travel distance, and extenuating circumstances. If you wish, you may apply a portion of your approved assistance to expenses incurred by a caregiver, up to the maximum assistance amount.

This program has limited resources and may not cover a person's total costs. However, we make every effort to relieve the financial hardship that may be associated with traveling to attend treatment.

*Welcome Everyone to the  
9th Annual PowerPak Bull Sale!*

Did any of you ever think you would see cattle prices like we had this past sale season? It's sure nice to see our hard work finally starting to pay the bills. As we look to the future, it looks like this cycle is here to stay.

One thing in the industry has not changed though, high quality cattle are still paying better. Both for feeder cattle and breeding stock. Cattle feeders are looking for calves that will feed quick, gain well, and stay healthy. Especially at the prices they are paying for our calves. Ranchers looking for replacement females are paying a little better for moderate framed, easy keeping cattle. Once they find a producer that provides them consistently, they keep coming back year after year. We are proud to say that we provide bulls to some of these producers.

Our 2014 calf crop was only 37% bulls, and I'm sure you will notice they are younger than usual. But we are confident that we are presenting a great set of bulls again this year. They are all structurally sound and have great hair coats. We place high emphasis on maternal traits in our program, while still maintaining good feed efficiency. We know the importance of moderate framed, easy keeping cows that milk well, have great udders, good feet, and live a long time. We are proud that most of our bulls are selling to repeat buyers. This tells me that our bulls are getting the job done. Those of you that have been using our bulls know that we do not push them, they do not melt away when they get put out with your cows, and they last for several years.

Please come and see the bulls and their dams before the sale. We enjoy giving the time to show you through our herd. If you have any questions, or cannot make the sale. Please give us a call and we will help you any way we can.

### Triple Red Triple Polled

We are very happy with 11U. His calves have come unassisted and grow well. They grow up to be easy fleshing, quiet, and very structurally correct. His daughters have loads of milk with nice udders and are easy to handle. His sons are very much in demand. He is seven years old now, and still walking like a cat. He will moderate frame, add milk, and fleshing ease to your herd. His son TBSF Odyssey 2Z is also making his mark in our herd. There are 3 sons of 11U and 4 sons of 2Z in the sale.

### Triple Red Triple Polled

We haven't used Mr. Pepper for a few years. We had 1 straw of semen left in the tank that we were saving for the right cow. I felt that 14W was the perfect fit for him, she is moderate framed and as easy keeping as any cow on the place. 32B is a meat machine. You will want to keep all of his daughters, and his sons will do great in the feedlot.

### Multi Black/Red Multi Polled

Here is Nathan's bull out of 46X. She is a small little cow that puts her all into growing a calf. Once again she brings the best bull in the black pen to town. She has hit it every year. 92B is another young calf keeping up to his older pen mates. He will add maternal power in a moderate frame to your herd.

yarrowcreekranch@gmail.com

As I am writing this introduction my Seattle Seahawks are going to the Super Bowl again!!

Yarrow Creek Ranch brings you an impressive set of 2014 bulls. We are lucky to sell a great combination of both performance cow bulls & sound, lightweight BW heifer bulls. In the fall, working the alley on selection day, Linda and I go round and round about why that bull is to be in the sale come March. We believe the information we know about the sire and dam will produce a good, sound product. As we learn, we also improve on our reputation. The bulls and mama cows will be available for viewing at the ranch prior to sale day. Enjoy the sale and the bull(s) you take home and come visit us anytime.

Have a look at our "new" website also; you can view our cows, herd sires and our ranch.

When I saw Redemption I just knew he would be our next A.I. bull for heifers. After talking with Neil Hueftle in Cozad, NE; who had raised the granddam HXC Jolene R548 and he stated; "sometimes he had wished he had never let go of her. One of the best cows he has ever raised"; that had just reaffirmed my decision. The Redemption bulls on offer today have been the most consistent with BW as I have ever seen. They should be as Redemption is in the top 1% BW with a CE of +18.0 and with an accuracy of 88%. Pretty awesome . . . He also is in the top 1% for YW . . . go figure. I believe Redemption will be one of the bulls that will leave behind a legacy for easy calving performance bulls. These will be the first Redemption sons to sell in Canada this year and I believe they will be on fire.

Heifer Bull - Briggs 1401B is out of a first calf heifer from the Lauron Red Angus program at Olds AB. I purchased this cow as a heifer at the Southern Alberta Chinook Sale for a pretty penny. The Jill family is one of Lauron's treasured female lines and out of their proven herdsire Wrangler Joe; fantastic cow and as I wrote this her second calf just hit the ground; just like clock work proven cows. These Redemption calves will speak for themselves come sale day.

EPDS BW -0.1	WW 71	YW 118
	Milk 16	TM 51

Bromwell 1408B should have been a heifer bull but with a little higher birth weight coming from the mother's X-Rated sire he do good on any other cows. He had the second highest weaning weight of 808lbs and with a WW index of 118 and a YW index of 118; now that's how heifer's should perform on their first calf. Bromwell likes to grow. Just look at his YW EPD +118.

EPDS BW 5.6	WW 74	YW 114
	Milk 14	TM 50

When we selected X-Rated 511X at the Cockburn sale in 2011, to introduce some power into our herd, we thought at that time X-Rated was a hell of a bull. Well now we know. He is now in the top 1% for weaning weight (WW) and also the top 1% for yearling weight (YW), and as a bonus he is also in the top 1% for Marbling. His calves have an average index of 103 on bull and heifer calves. We now have a few daughters milking and they have not disappointed us at all; with good udders and performance. Shouldn't be a surprise as the dam Cockburn Lasie 180M is a designated "Elite / Premier" dam which has a performance ratio of 108. The sire of X-Rated is the one and only Red Cockburn Ribeye 308U who sold in 2012 at the Soo Line dispersal for \$70,000 to Wildcat Creek Ranch Kansas. X-rated 511X himself is a deep ribbed, big hipped power bull who puts definite pounds on ALL calves. He's not a show bull like his sire but in these days pounds on the ground to market is what we are all looking for to take advantage of the cattle industry's excellent prices. He is also an all Canadian Sire!

Butte 1457B is another All Canadian X-Rated son that will bring you a ton of performance. He's coming on strong with a YW Index of 111 and weighing 1060 lbs. Look for him on sale day, I don't think it will be hard to pick him out of the pen. Out of my favourite power cows Yoakam 7S. She still brings in calves in the fall weighing over 700lbs. My kind of cow.

wes.gurney@telus.net

*Welcome Everyone to the  
9th Annual PowerPak Bull Sale!*

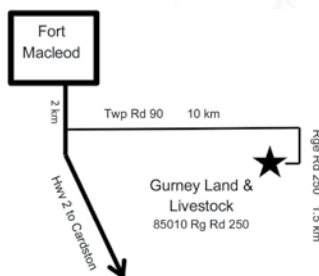

What an amazing time it has been in the cattle business this past year! Historic cattle prices are being paid across the board for all classes of cattle. It sure was fun and exciting to sell calves and cull cows and bulls this fall into such an amazing fall run of cattle. Plus bringing home those cattle checks made the wife and banker grin from ear to ear! The market experts say that this is just the beginning of great times in the cattle business. It will take a few years to meet the huge demand for beef the world is craving. Now is the time to invest in your herd and make improvements now that will allow you to take advantage of these high prices today and well into the future.

Here at Gurney Land & Livestock we have focused on improving the carcass quality of our cattle but not at the expense of maternal qualities. What does that mean to you as a bull buyer? With the improved ability to track animals, feedlots are, and will continue to identify the animals that grade well and bring premiums at slaughter. In the future, feedlot buyers will identify and source cattle with good carcass quality and will be willing to pay a premium to those breeders who can consistently bring these cattle to market. Increased carcass quality within your herd will add profit to your bottom line. The best way to improve your carcass quality within your herd is to use Bulls that have above average EPD's for carcass quality and now is a great time to invest in your cattle herd.

We have selected Bulls that meet these criteria for high EPD carcass merit and maternal values. GAR Predestined, Hoover Dam, GH Canadian Ras-cal (Xcess), Iron Mountain 8066, and Objective T510 will pass on these traits to your calves. We feel these bulls' offspring will increase your calves' carcass quality and produce improved replacement heifers for your herd.

We welcome you to come out and see the bulls for yourself and visit about how our bulls will help your bottom line.

This bull has exceeded all my expectations as a herd sire! If you study pedigrees at all you will see that my herd has a huge Willabar influence in it. I tried to buy 41Z Dam in the Willabar dispersal but failed, but given the chance to buy her offspring by Hoover Dam was a no brainer. Hoover Dam's progeny are thick, attractive and correct. A great Combination of calving ease, muscle and docility on a great set of feet! Top 10% or better in the breed for rib eye, carcass weight, marbling and fat EPD'S. Also top 10% or better in weaning weight and yearling weight and milk EPD'S.

40Z comes from another Willabar Dam (19U) out of the famed carcass and maternal sire Woodhill Foresight. 19 U is a very correct, and a moderate framed cow, which she has passed onto 40Z. His Sire Iron Mountain 8066 has remarkable thickness, muscling, and depth of hip with body volume rarely found in a true low birth weight bull. Iron Mountain 8066 is a premiere calving ease bull. 40Z has been used two years now on heifers and all calves come easy and quickly. Bull calves have averaged 84lbs and the heifer calves averaged 77lbs.

## 2014 Power Pak Bull Sale

### – TERMS & CONDITIONS –

**Terms of Sale:** The terms of the sale are cash or cheque, payable at par at the sale location. No release of livestock will be given until satisfactory settlement has been made. We reserve the right to withhold animals from shipment for which payments have not been received prior to departure time.

**Certificates of Registry:** A certificate of registry will be duly transferred to the buyer by the breeder for each bull after complete and full payment has been made.

**Cattle Inspection & Identification:** CCIA tags will be in all bulls. All bulls will be available for inspection prior to the sale.

**Breeding Guarantee:** We guarantee to provide you with a sound breeding bull, capable of passing a breeding soundness evaluation performed by a licensed veterinarian. In the unlikely event of any dispute, the regular terms and conditions that are standard with the Canadian Angus and Canadian Simmental Associations shall apply. Customer satisfaction is paramount to us.

**Fertility:** All yearlings will be scrotal measured and palpated prior to the sale and all yearling purchases will be semen tested prior to delivery. All bulls will meet or exceed breed standards.

**Delivery of Bulls:** We will offer free delivery within 200 km. of home; after that at cost. Delivery on the yearlings will commence early April unless prior arrangements have been made with the seller.

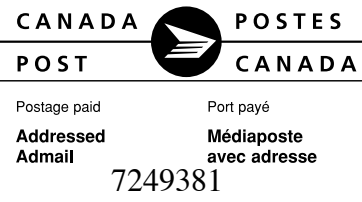

**Post Sale Bull Development:** We will winter your yearling bull purchases free of charge until April 1, 2012. After that, feed at cost of \$2/head/day will be charged.. All bulls returning to the consignors' must be insured. All bulls will be housed at buyers' risk, the consignors will not be responsible for any type of injury while the bulls are in their care.

**Bull Insurance:** Ownership risk to the purchaser commences when the Auctioneer's gavel falls. Livestock coverage will be available at the clerk's desk from our appointed representative on Sale Day.

**Accidents:** Although every precaution will be taken to protect the safety and comfort of the buyers; neither the sale staff nor the owners assume any responsibility in this manner and disclaim any liability, legal or otherwise, in the event of an accident or loss of property.

**Announcements:** Any changes from information in this catalogue will be announced from the auction block. Such changes will take precedence over the printed matter in the catalogue and therefore buyers are cautioned to pay close attention to any such announcements.
